

The Bruce Company has developed and maintained 900 acres of nurseries in several South Central Wisconsin locations for over 45 years.

We can create your landscape with healthy plants that will thrive in our climate and grow more beautiful for years to come.

- The Bruce Company has substantial shade trees and stately evergreens that can be moved from our nursery fields directly into your landscape with our truck mounted tree spades.
- Our nurseries also offer a wide range of sizes of balled and burlapped trees and shrubs for hand installation.
- We carry the area's best selection of container grown stock from the country's leading growers. We have unique varieties of flowering shrubs, small trees and distinctive evergreens.
- Our large inventory of perennial flowers and ornamental grasses range from smaller sizes for the patient gardener to mature specimens for an immediate impact.
- We keep up with gardening trends by adding new plants and varieties to our inventory every year.
- We stand behind our nursery stock with a full one year guarantee from the time of installation.
